

QuesTek has developed and is now offering through Dave Folts Transmissions a new high-performance 091 Ring and Pinion (4.57 Ratio) for off-road racing with the following benefits:

- ✓ Lasts Longer
 - Race tested by Deco Motorsports in '03 and Boyer Racing/Deco Motorsports in '04. Run in the '04 Primm 300 and Baja 1000 for a total of over 1500 race miles with no signs of wear or cracks. Designed to last a full season in SCORE.
- ✓ Saves money
 - No need to replace the R&P after every race. Simplifies race prep.
- ✓ Manufactured from *Ferrium*® C61, a high performance gear steel developed specifically for CART open wheel racing and now with applications in NASCAR.
- ✓ Klingelnberg design using the best available manufacturing equipment.
- ✓ All vacuum processing, from the melting of the steel to carburizing and heat-treating.
- ✓ Rob MacCachren's running it in 2005.
